FOREWORD

IN compiling the Indispensable Competition Dictionary, the Publishers have endeavoured to present in handy form a collection of words which will prove invaluable for use in compiling and solving all forms of competition puzzles ; in addition, a great deal of information has been included in the form of special short dictionaries, clues and other sections which render it most helpful and interesting for general reference purposes. The method of using the Indispensable Competition Dictionary requires little, if any, explanation. A combined form of classification has been adopted, firstly, according to subjects, secondly to the number of letters, and thirdly, to the alphabetical order. When solving Crossword Puzzles, Half-Words, Ladders, Discards, Add-a-Bit and similar competitions, the number of letters in the required word is known and usually also the subject, on turning up the subject heading all relevant words of the required number of letters will be found there grouped together in alphabetical order. Apart from this information, there will be found many lists of words dealing with such subjects as Artists, Authors, Composers, Explorers, Scientists and Geographical information provides lists of towns, rivers, mountains, bays, etc., with references as to their location. Finally a very comprehensive list of synonyms and antonyms is provided for further reference at the end of the book.

CLUES AND THEIR ANSWERS.

This section is one of the most important in this Dictionary. Altogether there are included in this section over 2,000 common clues as given in most competitions. They have been arranged in alphabetical order. The complete answer to each clue is given and the dictionary authority for such answer is also quoted. An important part of this section is the fact that most of the answers to the clues consist of two or more words and except in rare instances these differ from each other only in one letter. This section is, therefore, most useful for all competitions and should be carefully perused before deciding on any solution.

HOW TO USE THE CROSS-WORD ALTERNATIVE GUIDE.

With the spread of competitions in this country new alternatives have been introduced with such regularity that a measure of praise must be due to those compilers who have discovered alternatives which can only be found by hard thinking. Many new alternatives do not meet with the approval of competitors generally, but it is an established fact that all new solutions and alternatives are based strictly on dictionary definitions. That is one of the reasons why the possession of the Indispensable Competition Dictionary makes competition solving much more easy. A glance through the alternatives in the following guide may lead competitors to think that the grouping in some instances appears wholly unconnected as some of them have many different letters. These, however, have been compiled after many years study of Cross-word competitions and they offer in most cases solutions to certain established clues.

For instance, the Solutions ABC and ALP appear to have no connection of any kind, but if the clue given were to read "the first three letters of the alphabet" then it would be quite clear why these two words are included. This remark applies to all groups in this guide. Competitors must be careful to search the clues carefully and if necessary to consult a modern up to date dictionary.

The Indispensable Competition Dictionary is compiled in such a way that instant reference is possible.

As an example supposing the clue "A mixed noise" gives the word "Gabble" and the construction of the squares is such that other possibles may exist, we turn to Gabble and find others which may suit as Rabble, Babble, Tattle. In this way it is possible to come across an unusually unexpected solution particularly when compilers of cross-words are so partial to interlocking groups.

Competitors are always well advised to keep a careful look for new alternatives which, as a rule, originate in almost unexpected places. Also when clues call for a solution in plural the word may very often be found in its singular form in the list.

SHORT CUTS TO CROSSWORD SOLUTIONS.

The following list of words has been specially compiled to assist in the solution of those short words which often occur in crossword puzzles. A feature of this list is the fact that it eliminates the tiresome and tedious procedure of making long searches through many hundred pages of dictionaries. By scanning through the list of tabulated words it is comparatively easy to find a particular word which fits the solution sought for. All clue words having the same number of letters are grouped together and printed in block letters. This means that a clue in which only one letter is known can be very quickly followed up, as only those words in which the *known letter occurs in the right place* need be considered. This list contains a very wide range of words including many colonial and foreign words while the descriptions given have been cut down to the lowest limit and usually refer only to the lesser known meanings of the word. In addition to this there are classification letters such as B. for Botany, Eccl. for Ecclesiastical, Min. for Mineral, Z. for Zoology, Ast. for Astronomy, Myth. for Mythology and the following words in full, Coin, Law, Tool are placed at the extreme right edges of the line.

In this way clues are followed up much more easily than searching through numerous pages of dictionaries particularly when difficult and rare words are used as solutions.

Owing to the brevity of description given it is always advisable to refer to a standard dictionary in any case to verify any possible clues.

SELECTED DOUBLE MEANING WORDS

Sometimes spelt differently but pronounced in the same way.
Yet each having a different meaning.

Probably the commonest form of problem in certain puzzles to-day is the presence of a word which has two meanings—one usually a common one, the other little known.

For example, the list of alternatives in a puzzle may contain Stalk. The meaning apparent to every competitor would be the stem of a plant, but not all would know that a stalk is a chimney stack.

It is with the purpose of revealing these double meanings to competitors that the following dictionary has been compiled. Only the bare definitions have been given, but they are sufficient to indicate the meanings—sometimes as many as three or four—applicable to each word.

Full definitions, if required, can be found in the standard dictionaries. But crossword competitors should see that the words are in the dictionaries specified by the rules governing the puzzle.

ASSOCIATION OF IDEAS IN PICTURE PUZZLES.

In compiling picture puzzles editors always, as a rule, endeavour to catch competitors with the unobvious rather than the ultra-clever solutions. Competitors must always remember that the obvious solution can never always be the right one, otherwise the first prize would have to be divided amongst thousands of competitors. For this reason then most competitions introduce a number of alternatives and the alternative must ever be with us. How to deal successfully with it will always remain a problem for the competitor. It is an established fact that unobvious alternatives must always appear in the correct list on at least a couple of occasions, probably more if the competition is a large one, so it is always wise to select the unobvious solutions a few times even though it does not fit the picture as the generally accepted solution. A sound maxim in solving picture puzzles is the old one. "Two heads are better than one." Always remember that it is wise to ask your friends for their interpretation of certain pictures, as it is likely that they may see some hidden meaning in a picture that you have failed to detect, however expert you may usually be.

In "Association of Ideas" we have grouped together a number of words under certain headings. One word gives the idea of another word and thus it is possible to arrive at a correct word very quickly. Supposing the picture to a certain puzzle showed a group or number of people gathered together. By referring to the word Group or Assemblage we get a collection of words almost all of which cover the actual meaning of the picture. Competitors must then decide for themselves as to which of these words fits in best with the competition should it be in the form of a picture puzzle, Add-a-Bit, Ladders or something of that nature. Association of Ideas will save endless hours of search for alternatives and eliminate continuous searching through dictionaries.

Red Indian Tribes.

(C.)=Confederacy of Tribes.

(E.G.) = Ethnical Grouping of Tribes.

(S.A.) = South America.

Note.—All names of Tribes are shown in the *Plural*, as they are more often so used than in the *Singular*. A Crossword clue may, therefore, if indicating a single member of a tribe, or if the word "Tribe" is to follow, have one letter less than shown here. Exceptions are: "Blackfeet," "Illinois," "Iroquois," "Foxes," "Natchez," and "Sioux."

All are *North or Central American* except those marked "(S.A.)."

DICTIONARY OF SLANG.

It is always impossible to draw any hard and fast line between what is known as slang in the opinion of one person and not considered such in the opinion of the other. In fact the opinion of any two people upon what is really termed "slang" would be almost sure to differ. In the following pages we have included over 5,000 entries of the more commonly known specimens of English slang and colloquialisms which are met with in ordinary conversation or have appeared actually in literature of the past. We have also endeavoured to give the meanings in as brief a manner as possible and a reference to these pages will undoubtedly provide many competitors with terms of slang expressions not known to them. A thorough acquaintance in English slang is most important for competition purposes as very often the answer to a picture puzzle or crossword puzzle is couched in slang expression. The section is arranged in alphabetical order to facilitate easy and ready reference.

Synonyms and Antonyms

WORDS of similar meaning, though of entirely different form, are called *Synonyms*; their direct opposites, which contain ideas contrasted with the others, are called *Antonyms*. Gustave Flaubert, the great novelist and scholar, claimed that for every thought there was some special word which exactly gave the meaning as no other word could do; and he would spend hours, when he wrote, in searching for such a word which he styled *le mot juste* the unique expression, the idea in its relation to the rest of the sentence. This is so true as to give weight to the French proverb: "What is not clear is not French."

The English language is far richer than the French in Synonyms and Antonyms.

The following comprehensive and carefully selected list of Synonyms of words most commonly in use, while not exhaustive, is arranged in alphabetical order to facilitate rapid reference. The Antonyms of each word are placed in brackets.
